

The diagram illustrates a soccer field with a green background and a white grid. The field is marked with white lines for the goal areas, center circle, and half-way line. Two goalposts are visible on the left and right sides. A central circle is drawn around the center of the field. Numerous small white circles represent player positions. Red arrows and lines indicate the movement paths of one team, while blue arrows and lines indicate the movement paths of another team. A single yellow arrow and line represent the movement path of a third player. The paths are curved, suggesting dynamic movement across the field.
